

A2-Central Catalog

Get the books, software, and equipment you need from the warmth of your own computer room. **No handling fees** or extra charges for surface shipping on most items, even though we ship within 24 hours. To order, use the self-mailer that was in the envelope with your newsletter.

January 1991

Hyperbole

Be among the first on your planet,...be among the first in your millenium....

Hyperbole is stories. *Hyperbole* is poetry and art and sounds. *Hyperbole* is a new publication that mixes literary art and hypermedia.

There's nothing else like it anywhere....yet. Hypermedia-based publications delivered on disks or CD-ROMs will become as ubiquitous as magazines during the next 20 to 30 years. But *HyperStudio* and your Apple IIs make hypermedia publications possible today, and **A2-Central** is here to see that you get them.

Unlike the other publications you can get from us, which are all about some aspect of using Apple II computers, *Hyperbole's* content has nothing to do with computers and a lot to do with literary and artistic beauty and pleasure. In real life, *Hyperbole's* creator and editor, Greg Roach, is associate artistic director of the Stages Repertory Theatre in Houston.

Every other month you'll get two 3.5 disks for your Apple IIs that will put you on the forefront of what's happening in hypermedia and literature. (A note to parents: unlike our other publications, but like all literature, the material in *Hyperbole* ranges from G- to R-rated. Some selections are unsuitable for children.)

Each subscription to *Hyperbole* includes Issue 0, a sampler that has a special version of *HyperStudio* on it that you can use to access subsequent issues. There's no need to own *HyperStudio*. We'll send you the sampler by itself for just \$3.

Subscription prices	1 year	2 years	3 years
<i>Hyperbole</i>	\$42	\$81	\$117
6 issues/year, requires Apple IIs			

Subscription prices include free AIR MAIL delivery world-wide.

HB-SAMP *Hyperbole Sampler Disk* \$3.00

Sampler disk included free with your subscription.

New Stuff

Co-Pilot

Co-Pilot is a telecommunications utility program that provides you with easy access to GEnie. *Co-Pilot* lets you use the GS/OS desktop interface to do the time-consuming activities related to receiving and sending messages. With *Co-Pilot*, these activities are done completely offline. *Co-Pilot* allows you to set up your online activities before dialing GEnie. This assures a very rapid completion of online tasks and a lower connect charge.

Co-Pilot writes a script for your telecommunications program that will dial GEnie, log you on, get and post your electronic mail, read new messages in up to 11 bulletin boards, download up to 10 files, log you off, and return you to *Co-Pilot*. Then *Co-Pilot* will display the messages for you to read, archive, and respond to.

Co-Pilot works with *Talk is Cheap* v3.10 or later (listed in the "Telecommunications" section on the next page of this catalog) or with Beagle Bros' *Point-To-Point* v4.0 or later. You must have one or the other, as well as a modem-equipped Apple IIs.

KG-001 *Co-Pilot* \$25.00

ViVa MNP modem

For those of you who spend hours on line, we've started carrying the Computer Peripherals **ViVa24m MNP Modem**. Besides being hip looking, this 2400 baud modem supports MNP error correction and data compression levels 2 through 5 when connected to other MNP modems. Most GEnie nodes support MNP to level 4, for example.

MNP is a data communications protocol for error-free communication over ordinary voice-grade telephone lines. The classes of MNP have

varying levels of capability. With MNP Class 5, you typically set your modem-computer baud rate at 9600 even though the modem-modem baud rate will be lower (1200 or 2400 baud). Besides error detecting and correcting, two MNP Class 5 modems connected to each other will also perform compression of transmitted data. On ordinary text, the compression can be about 50 per cent, which doubles the effective baud rate.

110 volts. Requires a cable. Cables are listed in the "Telecommunications" section on the next page.

DC-008 *ViVa24m 2400 baud modem* \$169.00

ProDev Debuggers

ProDev has released its long-awaited Apple IIs debugger card. This card is a dream come true for assembly language programmers. Software on the card allows you to examine your program and memory variables at any time. You can step through your program instruction-by-instruction and watch stack and register changes. You can stop your program anywhere, including when any memory address you select is accessed—something that's possible only with a hardware-based debugger. Indispensible.

PD-001 *Debugger for IIs* \$189.00
PD-002 *Debugger for IIs* \$189.00

Understanding the Apple

Jim Sather's *Understanding the Apple II* and *Understanding the Apple IIs* are by far the best books ever written about the hardware design of the Apple II and IIs. We would have offered these books months ago but we couldn't find any and thought they were out of print. We just discovered a stash of them, however, and immediately

stocked up.

As Sather says at the beginning of the Apple II book, "Understanding of any subject is a relative thing. You may, for instance, say that you understand rain and mean that you know to go inside when it is raining. When a meteorologist says he understands rain, however, he speaks of a more significant level of understanding. Understanding of the Apple II can likewise mean various things. You may understand how to use it. More significantly, you may understand how to program it and recognize what programs are making it do. More significantly yet, you may understand how it works."

What Sather's books are about is how the Apple II and Apple IIs work. Sather shows you the beauty and elegance of Steve Wozniak's Apple II design in detail you won't find elsewhere for Apple IIs or any other computer. If you're interested in knowing something about computer hardware, these books are as good as books get. Each book includes hardware modification notes and a chapter on maintenance and care of your computer.

QS-002 *Understanding the Apple II* \$22.95
QS-003 *Understanding the Apple IIs* \$24.95

Rose16

Rose16 is Randy Brandt's replacement editor for the Apple Programmer's Workshop package. It's faster and more powerful than the APW editor, allows two files in memory at once, has rapid scrolling, fast macros, and your choice of APW or AppleWorks-style command sets.

Brandt is active in the Apple II Programmers and Developers RoundTable on GEnie, where he supports Rose16.

JE-009 *Rose16* \$15.00

About this listing

This is a complete list of the items we carry and their current prices, grouped by topic. The date shown with each item indicates the catalog that has a longer description of the item. We give a full description the first time an item appears in the catalog.

AppleWorks

Enhancements

JE-008	Outline 3.0 (AppleWorks 3.0)	(9/90)	\$39.00
JE-005	Pathfinder (AppleWorks 3.0)	(7/90)	\$20.00

Subscriptions, Back Issues, Ordering Information

A2-Central

A2-Central (formerly **Open-Apple**) has been published monthly since January, 1985. Single back issues are \$2 each. Bound, indexed annual volumes are \$14.95. A full set of bound volumes and single issues for the current year is available for \$39. The **Full-Text on Disk** version of our back issues is shipped on 3.5 disks and takes up about 4 megabytes of hard disk storage. Includes text-talking software or use with full-text search software such as *Fastdata Pro* or *Prosel*.

Bound, indexed back issue volumes

OA-001	Vol. 1	Jan 1985-Jan 1986	\$14.95
OA-002	Vol. 2	Feb 1986-Jan 1987	\$14.95
OA-003	Vol. 3	Feb 1987-Jan 1988	\$14.95
OA-004	Vol. 4	Feb 1988-Jan 1989	\$14.95
OA-005	Vol. 5	Feb 1989-Jan 1990	\$14.95

Full Set Specials (every issue ever published)

FS-N	All five volumes and current singles	\$39.00
FS-D	Our full text on 3.5 disks	\$39.00

A2-Central on disk

A2-Central disks have been published monthly since February, 1989. Each 800K, 3.5 disk contains the full text of that month's paper issue and text-talking software for blind subscribers. In addition, specific issues contain Apple system software and technical note updates and the world's best public domain and shareware software. Listings of the contents of each disk have been published in previous catalogs as shown below:

catalog	disk issues
Aug 89	2/89 to 7/89
May 90	8/89 to 12/89
June 90	1/90 to 2/90
July 90	3/90 to 6/90

Disks are available in 3.5 format only.

Back issues

Our back issue disks are available singly for \$10, in quarterly sets of 3 for \$6 each, or in annual sets of 12 for \$55 each:

A2-89FS	Annual disk set (Feb 89 to Jan 90)	\$60.00
A2-89S1	Quarterly disk set (Feb /March/April 89)	\$18.00
A2-89S2	Quarterly disk set (May/June/July 89)	\$18.00
A2-89S3	Quarterly disk set (Aug/Sept/Oct 89)	\$18.00
A2-89S4	Quarterly disk set (Nov/Dec/Jan 90)	\$18.00
A2-90FS	Annual disk set (Feb 90 to Jan 91)	\$60.00
A2-90S1	Quarterly disk set (Feb/March/April 90)	\$18.00
A2-90S2	Quarterly disk set (May/June/July 90)	\$18.00
A2-90S3	Quarterly disk set (Aug/Sept/Oct 90)	\$18.00
A2-90S4	Quarterly disk set (Nov/Dec/Jan 91)	\$18.00

Subscription conversions: Figure out how many disks you'll get between the first one you want and the month your subscription expires and send us \$4.75 per disk. **New subscriptions:** By subscription, our disks cost for less than what most user groups charge for public domain 3.5 disks, just 4.67 per disk ((\$84 - \$28) / 12).

8/16-Central

8/16-Central (formerly **8/16**) has been published every month since March 1990. Each issue consists of one 800K, 3.5 disk aimed at the hearts and minds of 8- and 16-bit Apple II programmers. Edited by Jay Jennings. **8/16-Central** back issues are available singly for \$10 each or in quarterly sets of 3 for \$5 each.

816-90S1	Quarterly disk set (March/April/May 90)	\$15.00
816-90S2	Quarterly disk set (June/July/Aug 90)	\$15.00
816-90S3	Quarterly disk set (Sep/Oct/Nov 90)	\$15.00

TimeOut-Central

TimeOut-Central has been published every other month since September, 1990. Each issue consists of one 800K, 3.5 disk and includes a column by the editor, letters from readers, as well as public domain and shareware AppleWorks and TimeOut files. **TimeOut-Central** back issues are \$10 each.

Hyperbole

Hyperbole will be published every other month beginning in January 1991. Unlike our other publications, **Hyperbole** isn't about computers. It's an eclectic hypermedia journal—a multimedia literature magazine. **Hyperbole** is stories. **Hyperbole** is poetry and art and sounds. **Hyperbole** is a new publication that mixes literary art and hypermedia. In real life, **Hyperbole's** creator and editor, Greg Roach, is associate artistic director of the Stages Repertory Theatre in Houston.

Each subscription to **Hyperbole** includes issue 0, a sampler that has a special version of **HyperStudio** on it that you can use to access subsequent issues. There's no need to own **HyperStudio**. We'll send you the sampler by itself for just \$3. (A note to parents: unlike our other publications, but like all literature, the material in **Hyperbole** ranges from G- to R-rated. Some selections are unsuitable for children.) **Hyperbole** back issues are \$10 each.

HB-SAMP	Hyperbole Sampler Disk	\$3.00
Sampler disk included free with your subscription.		

Stack-Central

Stack-Central has been published every other month since February, 1990. Each issue consists of two 800K, 3.5 disks and includes a **HyperStudio** stack containing editor Terry Baker's tips, tricks, and letters from readers for that month. Each issue also includes public domain and shareware stacks. Specific issues contain sounds, xcmds, and other material you can use in your own stacks. **Stack-Central** back issues are available for \$10 each.

SC-90S1	Semiannual disk set (Feb/Apr/Jun 90)	\$25.00
SC-90S2	Semiannual disk set (Aug/Oct/Dec 90)	\$25.00

Subscriptions

The expiration date of your current subscription is shown on our self-mailer to the right of your name ("last issue"). We offer one-, two-, and three-year subscriptions to the paper-only version of **A2-Central**, to a paper-plus-3.5-disk version of **A2-Central**, and to the 3.5-disk based **8/16-Central**, **TimeOut-Central**, **Hyperbole**, and **Stack-Central**.

	1 year	2 years	3 years
A2-Central	\$28	\$54	\$78
12 issues/year, paper only			
A2-Central (disk)	\$84	\$162	\$234

6 issues/year, 3.5 disk, requires Apple IIGS			
Stack-Central	\$42	\$81	\$117
6 issues/year, 3.5 disk, requires HyperStudio			

Subscription prices include free AIR MAIL delivery world-wide.

Ordering Information

If you received this catalog in the envelope with our newsletter, there was also a one-sheet self-mailer in the envelope. Your name, address, expiration date, and account number are already imprinted on one side of the self-mailer—on the other side you'll find an order form. Please use it to order stuff from us. When you fold and lick the form as shown, our address will be on the outside and it will be ready to stamp and mail. Please don't send us a photocopy of the form unless you **photocopy both sides**.

If you received this catalog without a self-mailer, write your order on a plain sheet of paper and send it to:

A2-Central
P.O. Box 11250
Overland Park, KS 66207

or call us:

Voice: 913-469-6502 Fax: 913-469-6507
